EXPERIENCE

RPA DEVELOPER

DAGBS Nigeria Limited, Lagos, NG, July 2019 – Present

With advanced and up to date knowledge of industry standards, I am able to develop automated processes that are robust and efficient, integrating with a wide range of tools and services to optimize business procedures and eradicate errors and repetitive work.

SOFTWARE ENGINEER

DAGBS Nigeria Limited, Lagos, NG, January 2018 – Present

As an innovative full stack developer with experience in troubleshooting, upgrading and enhancing existing systems, I design and develop new software applications, seeing them through the software lifecycle from vision to successful deployment with the best applicable technologies, be they functional, procedural or object oriented languages.

APPLICATION DEVELOPER, CONTRACT

Dataflex Nigeria Limited, Lagos, NG, August 2017 – December 2017

Within a short period of my resumption, I was able to successfully upgrade and deploy 2 applications with critical enhancements, earning 2 internal recognition awards from my partner firm. I went on to lead the Azure cloud migration integration projects, deploying the company's first cloud ready applications in a collaborative effort.

WEB DEVELOPER AND GRAPHICS DESIGNER, FREELANCE

Iresaadu, NG, May 2016 – March 2017

With the knowledge of HTML5, CSS3, SASS and Git, I developed Php and Wordpress based websites for small businesses and ideas. I also used Adobe Photoshop and Illustrator in the design of logos, icons and Certificate cards that were issued to schools at the local government sponsored quiz competitions.

JUNIOR SOFTWARE ENGINEER, INTERN

Chevron Nigeria Limited, Lagos, NG, June 2014 – November 2014

I worked with Operations Support engineers to triage, troubleshoot and remediate bugs and security vulnerabilities in business applications using knowledge of C# and VB. As an assigned project, I built a JavaScript based interactive quiz which was used in the Human Resources' team building and knowledge sharing event.

EDUCATION

BACHELOR'S DEGREE, ELECTRONIC AND COMPUTER ENGINEERING

Federal University of Technology, Owerri, NG, September 2010 – July 2015
