Work

Experience

FULL STACK APPLICATION DEVELOPER

Chevron Nigeria Limited, Lagos, Nigeria

August 2017 – Present

Develop and support business applications built with a wide range of technologies and frameworks in the Microsoft .NET stack. Design business reports and write data processing and analytics queries using T-SQL, and in some cases, Oracle's PL-SQL. Create elaborate documentation, architectural designs and user guides for software, offering on-call support for application users. Completed large critical upgrades on two applications in a space of three months, earning two Human Energy Awards.

APPLICATION DEVELOPER, GRAPHICS DESIGNER

Freelance, Operating as Lupine Bytes

January 2016 – July 2017

Designed National Youth Service Corps [NYSC] branded certificates for schools participating in Community Development Service organised quiz and spelling bee competitions. Served as peer trainer in web design course.

APPLICATION DEVELOPER / TIER 3 DESKTOP SUPPORT [INTERNSHIP]

Chevron Nigeria Limited, Lagos, Nigeria

June 2014 – November 2014

Debugged, tested and upgraded legacy business applications, converting from older

frameworks and technologies to current .NET framework, was assigned inventory management tasks, getting location and status of computing hardware in use, and safely disposing retired hardware with security wipes. Designed and developed HTML5 quiz for Human Resources team building activity, earning recognition for agile development and dedication.
